

- 1 Open a Safari browser and click on the Safari drop-down menu in the menu bar (the image shows a gear icon, but that was for older versions of Safari).

2 From the dropdown menu, select "Preferences."

3 Once in Preferences, go to the Security tab.

4 Uncheck the option "Block pop-up windows" to disable the functionality.

5 You cannot manage exceptions in Safari. You either block all websites from displaying popups or none at all.
